What is a 36V DC/DC converter?

A 36V DC/DC converter converts the input DC voltage to a 36V stabilised DC voltage. DWE supplies DC/DC converters with various input voltages over a wide range and different output voltages. All our 36V converters meet high quality standards and have a high efficiency.

What is a 36 volt inverter?

Looking for a 36 V inverter is often harder than finding a 12 V or 24V inverter since they are less common. Although not used as often, they still serve important roles in mid-range power applications. All of these higher-voltage systems should be used when powering equipment that draws over 3,000 W. Higher voltage is important for several reasons.
