# Albania solar power generation and energy storage

How many solar projects are there in Albania?

So far, the solar auctions have produced two PV projects with a total of 240 MW. Albania reports 7 GW of wind and solar potential and is looking into developing offshore wind in the Adriatic Sea. The availability of renewable energy resources in Albania for some renewable energy technologies is less studied than for others.

How can Albania improve its energy infrastructure?

2. Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

Does Albania have a potential for renewable resources?

Currently only hydropower makes a significant contribution to the current energy consumption in Albania. However, the country has significant potential for renewable resources in the form of wind, solar and biomass. o How EU directives affect the development of RES?

Who regulates the power sector in Albania?

The most significant institutions in setting policy and regulation in the power sector in Albania are the Ministry of Infrastructure and Energy ("MIE") and the Energy Regulatory Authority ("ERE").

Tirana-based Vega Solar, which develops, installs and maintains rooftop solar power plants, saw an opportunity to contribute to diversification with battery energy storage ...

Building a Sustainable Future for Albania solar energy Albania's solar expansion efforts align with its broader European integration goals and position the country as an ...

Until 2017 Albania only offered renewable energy incentives for hydropower and as a result solar PV and wind have remained underdeveloped. ...

The Southeast European country's solar and storage market is in its early stages but developing rapidly, drawing increasing investor interest and EU support. Discover the ...

The Storage Gap in Southeastern Europe While solar installations across the Balkans grew by 40% year-over-year in Q1 2025 [2], energy storage capacity remains stuck at 2019 levels. This ...

The study also assesses large-scale PV feasibility and emphasizes the need for integrated energy planning. This research aims to offer relevant information to Albanian ...

The 2030 RES Development Strategy of Albania aims to: (i) reduce energy imports and increase domestic RES electricity generation to meet 2030 demand by diversifying the ...

---

Why the Tirana Energy Storage Project Is Making Headlines a 330-million-euro battery quietly humming near Albania's capital, storing enough electricity to power 70,000 ...

Electricity generation experienced a year-on-year decrease of 5.5 percent. Nuclear and coal-fired power plants continued to dominate, providing 64.6 percent of total electricity ...

For 2024, Albania's solar energy production reached 225,000 MWh--though this remains significantly lower than the country's hydroelectric power generation. The Chamber of ...

The presentation aims to summarize Albania's solar energy resources, the use of PV technology for electricity production, its current and future status, benefits, growth and ...

Renewable Energy Potential Within Europe, Albania has some of the highest sunshine hours per year, representing significant potential for solar energy development. The ...

An intergovernmental organisation established in 2011, IRENA promotes the widespread adoption and sustainable use of all forms of renewable energy, including bioenergy, geothermal, ...

Why Solar Energy Storage Matters for Albania's Energy Crisis You've probably heard Albania's hydropower plants are struggling. With droughts reducing output by 40% in 2023 alone, the ...
