# Construction of container 5G base stations in Türkiye

When will 5G be available in Türkiye?

Türkiye will finalize the technical infrastructure for 5G technology by the end of the year, with plans for the service to be available by 2026, according to Minister of Transport and Infrastructure, Abdulkadir Uraloglu.

How many 5G locations are there in Turkey?

While 5G has already been tested at 34 locations across Türkiye, including Istanbul Airport, Uraloglu reaffirmed that full-scale deployment will align with the government's "domestic and national 5G" initiative. Efforts are also being made to accelerate research on 6G technology, which is expected to follow Türkiye's 5G implementation roadmap.

What is Türkiye's 5G vision?

The minister emphasized the importance of domestic production in Türkiye's 5G vision, stating that the country aims to manufacture telecommunication equipment and components locally, fostering technological independence and contributing to the national economy. Regulatory changes for 5G expansion

Will BTK conduct a 5G authorization auction?

5G auction, policy framework underway BTK is set to conduct a 5G authorization auction later this year as part of Türkiye's efforts to expand high-speed mobile connectivity. "BTK will focus on the technical infrastructure of 5G and complete policy and strategy proposals for the 5G authorization process.

"Our 'End-to-End National 5G Project' will produce base stations and core network components inside of Türkiye," he said.
