How long does it take P800 to switch to EPs mode?

When the power grid is out of power, P800 can quickly switch to EPS mode within 10ms. There is no need to fear the loss of computer files or the sudden stop of the fridge. You could stay away from the crisis of power outage. Safety and reliability are always the top priorities for a solar battery solution.

How long does it take to charge a P800?

Light and compact, You can take it lightly and rely on outdoor. The P800 is equipped with industry-leading charging technology, fully charging in only 60 minutes. You can charge the P800 while packing your luggage, so there's no need to worry about finding it out of power right before heading out. Multiple charging options are available.

Why should you buy a P800?

With its EPS < 10 ms design, the P800 automatically supplies emergency backup when a power outage occurs. It keeps essential home backup systems--routers, computers, lights--running seamlessly. Perfect for off-grid living or areas needing reliable power during storms. 5) What about battery life and battery storage capacity?
