# Energy storage lithium-ion battery industry

What is the global lithium-ion battery market size?

The global lithium-ion battery market was estimated at USD 75.2 billion in 2024 and is expected to grow at a CAGR of 15.8% from 2025 to 2034. Lithium-ion batteries are ideal rechargeable battery used in EVs, renewable energy storage. Increasing transition towards green energy is driving market growth.

Who uses lithium ion batteries?

IEA. Licence: CC BY 4.0 Despite the continuing use of lithium-ion batteries in billions of personal devices in the world, the energy sector now accounts for over 90% of annual lithium-ion battery demand. This is up from 50% for the energy sector in 2016, when the total lithium-ion battery market was 10-times smaller.

Are lithium-ion batteries a viable energy storage technology?

Lithium-ion batteries have become the dominant energy storage technology due to their high energy density, long cycle life, and suitability for a wide range of applications. However, several key challenges need to be addressed to further improve their performance, safety, and cost-effectiveness.

Are lithium-ion batteries sustainable?

The lithium-ion battery industry is driving the global clean energy transition but faces growing sustainability challenges. Pollution and recycling bottlenecks span the entire materials life cycle, emphasizing the urgent need for integrated chemical, environmental and policy frameworks to guide risk assessments and sustainable development.

The global lithium-ion battery energy storage market size is projected to be worth USD 32.37 billion in 2025 and expected to reach ...

The lithium-ion battery market size crossed USD 75.2 billion in 2024 and is expected to grow at a CAGR of 15.8% from 2025 to 2034, driven by the ...

The global energy storage lithium-ion battery market is undergoing rapid expansion, driven by energy transition, policy support, technological advancements, and cost ...

The lithium-ion battery industry is driving the global clean energy transition but faces growing sustainability challenges. Pollution and recycling bottlenecks span the entire materials ...

The global energy storage lithium-ion battery market is undergoing rapid expansion, driven by energy transition, policy support, ...

Lithium-ion batteries are rechargeable energy storage devices widely used in various industries. They are essential for powering tools, machines, and equipment in modern ...

The global market for Lithium-ion batteries is expanding rapidly. We take a closer look at new

---

value chain solutions that can help meet the growing demand.

The global lithium-ion battery energy storage market size is projected to be worth USD 32.37 billion in 2025 and expected to reach USD 113.64 billion by 2032

The global energy storage lithium-ion battery market is experiencing robust growth, driven by the increasing demand for renewable energy sources and the need for grid ...

The leapfrog development of LIB industry has resulted in significant demand on mineral resources and thus challenges to its sustainability. In 2018, worldwide lithium ...

The battery energy storage system (BESS) focus continues to expand in the report, just as it expands in real life. Volta adds data to the ...

Lithium-ion batteries dominate both EV and storage applications, and chemistries can be adapted to mineral availability and ...

The market trends of lithium-ion batteries are dynamic and reflective of the evolving landscape of energy storage technologies. Lithium-ion batteries have experienced substantial ...

Lithium-Ion Battery Energy Storage System Market size was valued at USD 17.47 Billion in 2024 and the total Lithium-Ion Battery Energy Storage ...
