## Integrated solar panels and prices

How much do integrated solar panels cost?

Installing integrated solar panels for an average 3-bedroom home costs somewhere between \$5,000 - \$6,000. With such an installation, you can expect savings of up to \$660 per year on your electricity bill. If you're looking to seamlessly blend form and functionality, then installing integrated solar panels might be a great option for you.

Are integrated solar panels worth it?

It's a great look for any style of house. Although they were once much more expensive than on-roof panels, integrated solar panels are now pretty affordable- great news, since 69% of people ranked cost as the most important factor when evaluating which low-carbon product to purchase.

How much does a solar panel installation cost?

Installation charges typically range from 20% to 30% of the total system price. Professional installers follow local restrictions and optimize panel placement for best efficiency. The small size of the excellent solar panel system makes installation easier, lowering labor time and associated expenses.

What are integrated solar panels?

Integrated solar panels, also called in-roof solar panels or built-in solar panels, are designed to be installed as part of your home's roof. They replace a section of roofing material rather than being mounted on top of the existing roof.
