
Large-scale energy storage installed capacity

How big is energy storage in 2024?

By the end of 2024, the cumulative installed and operational capacity of new energy storage projects nationwide reached 73.76 GW/168 GWh, approximately 20 times that of the end of the 13th Five-Year Plan and more than 130% higher than at the end of 2023.

Which region has the most energy storage capacity?

The distribution of installed capacity by region was as follows: North China (30.1%), Northwest China (25.4%), East China (16.9%), Central China (14.7%), Southern China (12.4%), and Northeast China (0.5%). New energy storage stations are increasingly centralized and large-scale.

How big is China's Energy Storage Base?

According to official National Energy Administration data from its recent 'China new energy storage development report 2025,' the country's installed base at the end of 2024 totalled 73.8GW/168GWh. The China Energy Storage Alliance (CNESA) trade group said this represented a 130% year-on-year increase and about 40% of the global total.

What types of energy storage are included?

Other storage includes compressed air energy storage, flywheel and thermal storage. Hydrogen electrolyzers are not included. Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Energy Storage Capacity Allocation for Power Systems with Large-Scale Grid-Connected Wind and Photovoltaic Power | IEEE Conference Publication | IEEE Xplore

Utility-scale projects are driving capacity gains in Saudi Arabia, South Africa, Australia, the Netherlands, Chile, Canada and the UK. In the Europe-Middle East-Africa ...

China's electrochemical energy storage industry saw explosive growth in 2024, with total installed capacity more than doubling year-on-year, according to a report released by the ...

By the end of 2024, the cumulative installed and operational capacity of new energy storage projects nationwide reached 73.76 GW/168 GWh, approximately 20 times that ...

a large amount of large amounts of 1a large amount of + large amounts of+ A large amount of ...

Utility-scale projects are driving capacity gains in Saudi Arabia, South Africa, Australia, the Netherlands, Chile, Canada and the ...

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to ...

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion ...

BEIJING, Jan. 24 -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

Discover how large-scale energy storage systems boost grid flexibility, enable renewables, and power a cleaner, reliable future.

China's electrochemical energy storage industry saw explosive growth in 2024, with total installed capacity more than doubling year-on ...

According to official information, as of May this year, the proportion of new energy installed capacity in Xinjiang, Inner Mongolia, and Qinghai exceeded half of total local ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.
