
Latvian containerized generator BESS

Will Latvenergo become Baltic leader in battery energy storage systems?

Energy company Latvenergo said February 18 it is investing heavily in battery systems with the stated intention of becoming the the Baltic market leader in battery energy storage systems (BESS).

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Will Bess be able to deploy storage capacity across Baltic states?

“Future projects will be carefully evaluated to strategically deploy storage capacities across the Baltic states in order to maximise the benefits for the security of supply and customers,” the company added, giving a broad hint that it will also be looking to place BESS assets in Estonia and Lithuania.

Where are Bess projects being implemented?

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger storage solutions, including at Riga HPP and Latvenergo AS CHPP-2. The procurement and selection of suppliers for the latter projects is currently in progress.

Latvian state-owned utility Latvenergo AS has decided to invest in a new business area in its portfolio with plans to install 250 ...

Latvia's first utility-scale battery storage project has been commissioned, while Fotowatio Renewable Ventures has entered the ...

About Japan Osaka containerized generator set BESS As the photovoltaic (PV) industry continues to evolve, advancements in industrial and commercial energy storage systems, ...

Latvia state-owned utility and power generation firm Latvenergo intends to deploy 250MW/500MWh of BESS in the next five years.

Discover hybrid power systems and the benefits BESS including reduced fuel usage, low CO2 emissions, and eliminating unwanted noise.

Residential battery energy storage systems (BESS) primarily serve two purposes for homeowners. First, they capture energy generated by solar panels and store it for use ...

Cummins BESS solutions are fully containerized, offer plug-and-play functionality with generators and controllers, and meet or exceed all major international requirements.

Latvenergo, a state-owned energy company based in Latvia, plans are to expand its generation portfolio with the development of battery energy storage systems (BESS), ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a ...

Vestas Impetus Power Systems delivers high-quality Containerized Battery Energy Storage Systems (BESS) designed to provide scalable, flexible, and reliable energy storage solutions ...

Latvian state-owned utility Latvenergo AS has decided to invest in a new business area in its portfolio with plans to install 250 MW/500 MWh of battery energy storage capacity ...

Latvenergo, a state-owned energy company based in Latvia, plans are to expand its generation portfolio with the development of ...

Containerised generators designed to your exact requirements. Noise requirements, fire-safety, cabling, control interfaces and fuel solutions.

Latvia state-owned utility and power generation firm Latvenergo intends to deploy 250MW/500MWh of BESS in the next five ...
