
Metal clad switchgear factory in Pakistan

What is metal clad medium voltage switchgear?

Metal Clad Medium Voltage Switchgear is used for the protection of medium voltage feeder circuits. Panel is divided into four grounded and fully isolated compartments ensuring high level of safety. Vacuum Poured insulation ensures the safety of operations.

What is a switchgear panel?

Switchgear Panels are extensible on both sides. These panels are used for power factor correction and manufactured as indoor units with fixed or automatic capacitor switching. The panel is designed to align and couple with the LT distribution panels. If requested, reactors can be used to eliminate unwanted harmonics.

What is me switchgear?

With over 30 years of panel design, research and manufacturing from its parent company, ME Switchgear offers a wide variety of fully type tested, LV Switchgears, including MDBs, MCCs, Synchronizing Panels, Capacitor banks and much more. ME Switchgear can power the most advanced structures, projects & industries.

Who makes LV switchgear?

Our goal then and now is to provide quality LV switchgear on time. With over 30 years of panel design, research and manufacturing from its parent company, ME Switchgear offers a wide variety of fully type tested, LV Switchgears, including MDBs, MCCs, Synchronizing Panels, Capacitor banks and much more.

Generally metal clad switchgear is used to distribute electric power in a variety of demanding applications such as in power plants, utility substations, cement and petrochemical factories, in ...
