
Portable power source factory in Los-Angeles

Where are solar power plants made?

Headquartered in Shanghai with 50,000m²+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology. ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel.

What is a portable power station?

It typically use lithium-ion batteries to store energy and convert it to AC or DC power that can be used to charge electronic devices, power appliances, or even run power tools. They are compact and lightweight, making them easy to transport and set up. One of the biggest advantages of portable power stations is their versatility.

What are the advantages of portable power stations?

Another advantage of portable power stations is their eco-friendliness. Since they use rechargeable batteries, they don't produce harmful emissions like traditional gas-powered generators, making them a more sustainable option for powering your devices and appliances.

How do I choose a portable power station?

When choosing a portable power station, there are several factors to consider, including the capacity of the battery, the number and type of outlets available, and the overall size and weight of the unit. Some models also come with additional features like built-in inverters, USB ports, and LED lights.
