## Replacing power tool lithium batteries

How do you replace a battery in a power tool?

You'll need new cells, a soldering iron and rosin-core solder, a glue gun, and some wire and tape. The whole process takes about an hour. Most power tool battery packs use 1.7-in. x .9-in. "Sub C" size batteries. Remove the screws that hold the pack together and yank the top off. Then remove the cluster of batteries and measure one of the cells.

How do you charge a power tool with a lithium ion battery?

To charge a power tool with a lithium-ion battery, connect the battery to the charger. Before doing so, ensure the battery is properly secured in the battery case. One important point to remember: never completely discharge the battery.

How do I choose a replacement battery for a cordless tool?

Browse a variety of cordless tool batteries compatible from brands like Craftsman, DeWalt, Milwaukee and more. When it comes to choosing a replacement battery for your cordless power tools, the voltage of a particular battery will determine its overall operating torque. The higher the voltage rating, the higher the power.

How should a power tool battery be maintained?

To maintain a good connection between the battery and your portable device, clean dirty power tool battery contacts with a cotton swab and alcohol. Do not leave your battery dormant for long periods of time. This helps maintain the battery.
