## Saint Lucia 96v to 220v inverter supply

Do I need a voltage converter in Saint Lucia?

As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Saint Lucia. If the frequency is different, the normal operation of an electrical appliance may also be affected. For example, a 50Hz clock may run faster on a 60Hz electricity supply.

What is the supply voltage in Saint Lucia?

In Saint Lucia the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.
