# Shanghai Unsold solar Module Project

Is Shanghai's largest photovoltaic project fully connected to the grid?

Shanghai's largest photovoltaic project is fully connected to the grid! Recently, the largest centralized photovoltaic project in Shanghai, the Shanghai Chongming Port West Fisheries Photovoltaic Complementary Photovoltaic Power Generation Project, was connected to the grid at full capacity.

Will Shanghai start a solar power project?

Shanghai will begin the first round of selections for offshore solar power generation projects with a minimum scale of 1 million kilowatts by the end of this year, according to the Shanghai Municipal Development and Reform Commission. The move is part of the country's stepped-up efforts to promote the development of offshore solar energy.

What's going on with offshore solar power in Shanghai?

An offshore PV company's booth is seen during a solar power expo in Shanghai in June. [CHINA DAILY] Shanghai will begin the first round of selections for offshore solar power generation projects with a minimum scale of 1 million kilowatts by the end of this year, according to the Shanghai Municipal Development and Reform Commission.

What is China's first centralized solar energy project?

This project is China General Nuclear Power Corporation's first centralized solar energy system project in Shanghai, with an installed capacity of 158 MW. It will be implemented in two phases.

This project is part of the fifth round of Saudi Arabia's National Renewable Energy Program (NREP) and represents Shanghai Electric's largest photovoltaic EPC contract to date.
