## Solar glass carport and price

How much does a solar carport cost?

For a typical 5-kilowatt residential solar carport, homeowners can expect to pay approximately \$15,850 before incentives. After applying the 30% federal solar tax credit, the net cost drops to around \$11,095. Solar carports typically achieve payback periods of 8-12 years, depending on local electricity rates and solar irradiance.

What is a solar PV carport?

A solar PV carport is highly efficient in utilising space to generate renewable energy. These carports help reduce electricity costs and carbon footprint by transforming parking areas into energy-producing zones. They can be designed to optimise sunlight capture and often come with integrated EV charging points, enhancing their functionality.

Does a solar carport come with a battery?

In any new solar array, your installer can also supply a battery or EV Charger, if desired, at an additional cost. Delivery and Installation Process. Delivery is not included in the price, phone the office for a delivery quote. The Double Solar Carport is easy enough for DIY installation.

Is installing a solar carport a good investment?

A solar carport allows you to enjoy the benefits of solar without replacing your roof. While it is more expensive than a ground mounted array, it is still a worthwhile investment. The extra cost is due to the larger size and complexity of the framework.
