## Solar module export off-season

How many solar modules did China Export in 2024?

(Photo Credit: TaiyangNews) Between January and September 2024 this year, Chinese solar PV manufacturers together shipped 186.77 GW of solar modules, representing a year-on-year (YoY) increase of 18% compared to 157.65 GW exported during 9M 2023, according to InfoLink Consulting.

How many GW of modules did China Export in November 2024?

China exported 15.2 GW of modules in November 2024, down 12% MoM from 17.34 GW and down 14% YoY from 17.71 GW, according to InfoLink's customs data. China exported 219.31 GW of modules from January to November 2024, up 14% YoY from 191.81 GW.

How did China's solar market perform in Q3 2024?

The most obvious decline was in the European and Asia Pacific markets. China exported close to 6.8 GW of solar modules to Europe in September 2024, a 17% MoM and an 11% YoY drop. In aggregate terms, in Q3 2024 the shipments totaled 23.53 GW, and in 9M 2024, these added up to 85.33 GW.

What is the global solar PV market demand forecast for 2024?

For 2024, InfoLink expects global solar PV market demand to grow up to 533 GW, and for the following year, its projection is up to 568 GW (see 2024 Global Solar PV Market Demand Projected To Reach Up To 533 GW).

China's module exports declined in November due to Europe's off-season in Q4, India's ALMM and focus on local capacity, and the nearing depletion of Brazil's duty-free ...

The global export volume of Chinese solar PV modules in November 2024 at 15.2 GW represents a 12% month-on-month (MoM) and a 14% year-on-year (YoY) decrease, according to InfoLink ...

China's solar module exports fell to 16.53 GW in September, down 12% from August and 16% year on year, according to PV InfoLink. Third-quarter exports reached 54.9 ...

To the Middle East, Chinese solar module exports totaled 2.43 GW, a 2% MoM and a 31% YoY decline in the month of September. For Q3, it amounted to 7.43 GW and ...

To the Middle East, Chinese solar module exports totaled 2.43 GW, a 2% MoM and a 31% YoY decline in the month of September. ...

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which ...

The sharp decline in imports in September was mainly due to the off-season. Moreover, Pakistan had already imported considerable amount of Chinese modules this year, ...

---

China's combined crystalline silicon solar module production output within the 10 months of this year rounded up to 453 GW. It ...

In July, photovoltaic module exports reached approximately 20.12 GW, up 4.7% month-on-month but down 1.1% year-on-year. The ...

From January to September 2024, Pakistan imported a total of 14.6GW of Chinese photovoltaic components. This dramatic drop in imports is primarily due to the off-season in ...

Additionally, regulatory uncertainties regarding the ALMM will put off the Indian buyers. Meanwhile, Europe will enter a high season, with Pakistan, the Middle East, Africa, ...

Moreover, China's photovoltaic module exports are expected to experience cyclical fluctuations, with two export peaks and one trough before 2060. Additionally, the reshoring ...

The Ministry of Finance and the State Administration of Taxation issued the "Announcement on Adjusting the Export Tax Rebate Policy", proposing to reduce the export ...

InfoLink's customs data shows that China exported about 21.39 GW of PV modules in April 2025, down nearly 9% MoM but up 2% YoY from 20.93 GW. As of the end of ...
