
The first energy storage project in Northern Europe

What is the biggest energy storage project in Northern Ireland?

The largest energy storage project in Northern Ireland is located at Drumkeel, a townland in Killyman, with a capacity of 50 megawatts. It uses state-of-the-art lithium-ion technology to serve the island's single electricity market.

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore "energy atoll" (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

What is Europe's largest battery energy storage system?

While these projects boast massive planned capacities, the largest active BESS in Europe is now the first 400 MWh phase of ENGIE's 200 MW / 800 MWh system in Vilvoorde, Belgium, which has officially gone live. Sungrow and ENGIE bring Europe's largest battery energy storage system online in Belgium with the completion of its first 400 MWh phase.

Which battery energy storage system projects are backed by a reputable developer?

As of mid-late 2025, four utility-scale Battery Energy Storage System (BESS) projects stand out by size -- each designed in the 0.5-2.8 GWh class and backed by reputable developers and public filings. Below I summarise each project, its capacity, status and why it matters. 1. Green Turtle (Rotem/Dilsen-Stokkem, Limburg -- Belgium)

The first phase of the project has a storage capacity of 1.5 Mt CO₂/year, which has been fully booked by customers from Norway and Continental Europe. Final Investment ...

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

Credit: max.ku via Shutterstock. EVE Energy and Swedish energy storage system integrator Vimab BESS have signed a three-year memorandum of understanding (MoU) ...

Northern Europe has become a hotspot for independent energy storage projects, driven by renewable energy expansion and grid modernization needs. Countries like Sweden, Norway, ...

Located in Norway, Northern Lights is the world's first CO₂ transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational ...

A new era for carbon capture and storage (CCS) has begun. TotalEnergies, alongside partners Equinor and Shell, has officially ...

EVE Energy, a Chinese manufacturer of batteries and storage systems, has signed a three-year memorandum of understanding with Swedish integrator Vimab BESS AB ...

A demonstration combining tidal power, battery storage, and hydrogen production has been completed in Scotland, marking what is ...

Why the Baltics' Largest Battery Project Matters Now As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery ...

The project leverages existing infrastructure operated by the Danish Underground Consortium and other key energy players, such as owners of offshore fields, facilities, and ...

Located in Norway, Northern Lights is the world's first CO2 transport and storage project open to industry, owned equally by ...

A demonstration combining tidal power, battery storage, and hydrogen production has been completed in Scotland, marking what is said to be the first time these three ...

A new era for carbon capture and storage (CCS) has begun. TotalEnergies, alongside partners Equinor and Shell, has officially inaugurated the Northern Lights project, ...
