
Uninterruptible power supply equipment for Valparaiso Hospital in Chile

Why do hospitals need an uninterruptible power supply (UPS)?

That's why we're proud to offer our uninterruptible power supply (UPS). Our UPS provides an uninterrupted power supply to hospitals and other medical facilities, protecting critical equipment, data, and personnel since 2001 for over 500 projects. With our UPS, hospitals can rest easy knowing that their power source is secure and dependable.

What is an uninterruptible power supply?

Uninterruptible power supplies keep a steady current flowing to maintain performance over time. In addition to diagnostic equipment, UPS systems provide battery backup for life-sustaining medical equipment in the event of an emergency.

What is a Cyberpower medical grade UPS system?

CyberPower Medical Grade UPS systems have been designed to power and protect sensitive equipment in hospitals and healthcare facilities. Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer.

Why should healthcare facilities install an UPS system?

Consider, also, that healthcare facilities require reliable power to operate numerous critical medical care devices. Magnetic Resonance Imaging (MRI), Computerized Tomography (CT) scanners, X-ray, gas analyzers, ultrasounds, and imaging devices are all potential candidates for a UPS installation to ensure their operational performance.
