# Uninterruptible power supply with built-in battery room

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is way more than just a surge protector, it's meant to save your time as well as your devices. These surge protectors with a built-in backup battery provide a safety net by delivering continuous power during an outage, giving you time to save your work and safely shut down your equipment.

What is a power supply unit (PSU) & uninterruptible power supply (UPS)?

A Power Supply Unit (PSU) is a crucial part of a PC that connects all components to a single input for power. An Uninterruptible Power Supply (UPS) is more for safeguarding your PC against power issues. It's useful, but for first-time builders with generally stable electrical connections, not essential.

What is a good ups with a built-in backup battery?

A UPS with built-in backup batteries is essential for protecting your devices from power outages, surges, and other electrical disturbances. Whether you opt for the high-capacity APC Back-UPS Pro 1500VA or the compact and budget-friendly Vertiv Liebert PST5, each UPS on this list offers reliable protection and peace of mind.

What is a DC-UPS with external batteries?

The DC-UPS with external VRLA batteries feature the PULS" 1-Battery-Concept: This means each battery is individually charged and monitored, which avoids the need for matched batteries and ensures longest battery life. What is a UPS module? UPS is the short version of "uninterruptible power supply";
