## Which 5MWh solar container in Latin America is more environmentally friendly

Will Latin America's solar market hit its peak this year?

Wind and solar installations in Latin America have been on a dramatic growth trajectory. Small-scale solar build in Brazil has driven the market to quintuple over the past five years, and new energy bills in Argentina and Mexico promise to promote clean energy investments. Regional build should hit its peak this year.

What is the largest solar project in Latin America and the Caribbean?

As of 2018, the largest project in Latin America and the Caribbean was the Villanueva solar PV plant with an installed capacity of 828 MW, located in Viesque (Mexico). In 2019, at COP 25 in Madrid, ten Latin American and Caribbean countries announced plans to achieve 70% renewable energy in their energy mix by 2030.

Are solar power plants a trend in Latin America?

Along with the growth of stand-alone power systems, the construction of large solar power plants in Latin America is one of the leading trends in the development of the local energy sector.

Is Uruguay a good country to invest in solar energy?

At the beginning of the last decade, Uruguay was a pioneer country in the development of solar energy in Latin America. It was one of the first countries to hold a dedicated auction for large solar energy projects, and for a time it was one of the region's few PV markets.

The Latin America off grid solar container power system market is driven by a combination of established multinational corporations and innovative local companies.

ContourGlobal notes that it is the largest solar-plus-storage project in Latin America, providing clean energy to the region. Alongside Quillagua, ContourGlobal acquired ...
